SPECIALTY DENTISTRY

PROSTHODONTICS

## Discover the pinnacle of expertise with board certification.

This prestigious accreditation is the gold standard within specific specialties, such as prosthodontics. To attain [board certification](#), prosthodontists like Dr. Pavinee undergo a rigorous examination process, showcasing their proficiency and professionalism to fellow experts.

When you choose a board-certified prosthodontist, you're guaranteed care from a practitioner endorsed by their peers, dedicated to continuous learning, and committed to providing you with the highest level of service.

Their expertise lies in addressing dental and facial issues related to restoring missing teeth and jaw structures.

**Your peace of mind begins with board-certified excellence.**

- cosmetic dentistry
- dental implants
- crowns, bridges
- dentures
- treatment of temporomandibular disorders (TMJ/TMD)

Prosthodontists stand out as specialists with extensive training in tooth restoration and replacement.

They are at the forefront of dental treatment planning, often leading interdisciplinary teams that include general dentists, specialists, and healthcare professionals.

Their primary focus is on crafting tailored solutions to meet your dental needs.

## **Prosthodontists: masters of comprehensive dental care:**

- Specialized Training
- Diverse Expertise
- Leadership in Restoring Your Smile

Prosthodontists undergo extensive training, including at least three years in a CODA-accredited prosthodontic graduate program.

They possess expertise in dentistry, such as cosmetic procedures, dental implants, crowns, bridges, and dentures.

Prosthodontists often lead in developing customized solutions for dental needs, leading interdisciplinary teams of dentists, specialists, and healthcare professionals to ensure comprehensive care.

**TRULY  
COMPREHENSIVE  
EXAMINATION**

You want your dentist to be as thorough as humanly possible when performing your examination. **The right dentist will:**

Analyze the form of your teeth, their proper function, your gum health, bone health, bite issues, any existing dental work and its impact on your overall oral health.

They will have the ability to perform digital X-rays, and have access to key technology, such as intraoral 3D scanning, intraoral cameras, monitors, study models, oral cancer screening, sedation, and more.

Offer patient comforts such as a gentle touch, sedation dentistry options, and more. Making the comprehensive examination a relaxing and pleasant experience.

**An examination like this will make sure nothing is overlooked and your results will be done right the first time, lasting for years.**

*#3*

---

**AN ARTISTIC  
EYE AND A  
SCIENTIFIC  
SENSE**

Your smile is a precious piece of art, but there is a science behind it. **The right dentist for your new smile understands this and will:**

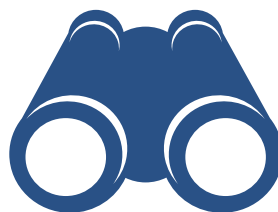

Accurately evaluate your needs, time, personality, and discuss finances.

Discuss your skin tone, eye color, lip shape, proportions, and proper function.

Always be precise in execution and meticulous in craftsmanship.

**To achieve optimal aesthetic results, your dentist must have a clear vision of what is artistically possible and appropriate for you in the long run.**

*#4*

---

**OPEN YOUR  
EYES TO THE  
POSSIBILITIES**

## Be aware:

You'll want to look at Before & After photos of cosmetic stories similar to yours that your dentist has performed in the past.

Commercially-produced photos and albums show the general results, but you need to confirm you are seeing the actual work of the dentist you are considering.

**Make sure the images are  
from ACTUAL patients.**

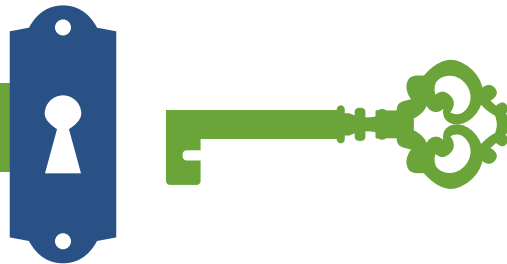

*#5*

---

**EXTENSIVE  
SMILE DESIGN  
EXPERIENCE**

## Experience is key:

Great dentistry for your smile is a beautiful and expressive art, just like you. Not all dentists have the same experience mastering this art.

If you are considering veneers, for example, ask how many veneers your dentist has placed. Look for dentists for your new smile who have placed not just hundreds, but thousands of veneers. This showcases your dentist's wide range of experience with different smiles and unique circumstances, making them credible to deliver the same experience and expertise to your work of art—your smile.

*#6*

---

**AN HONEST AND  
CONFIDENT  
COMMUNICATOR**

## Communication is everything:

The right dentists for your new smile will be confident in their abilities, backing it up with extensive experience and amazing results. They'll be able to answer all of your questions and address your needs clearly, explain simply how the procedure is going and be able to communicate kindly, patiently, and professionally as you go through the journey.

## TRY THIS:

Ask your dentist how many patients have been dissatisfied with their results. Then, ask them how they chose to correct and handle the situation. This will give you a clue to how they will communicate with you down the road, how well they will listen, and how they will make you feel.

**Your smile is imperative to  
your confidence and joy.  
Place it in the right  
hands and you'll have an  
experience like never before.**
